## INTRODUCTION

At this moment, issues related to my HP printer are making me very infuriating that I just want to throw out my printer out of the window. The minute before it was printing pretty good but now, it shows printer driver is missing. I didn't change a bit in any of the settings of printer so why I am getting this error. Right now, I have no idea what to do. So, I just needed someone's guidance for downloading drivers from [123.hp.com](https://123.hp.com) website. Can anyone out there help me?

## Step 1 — How can I download printer's drivers from 123.HP.Com?
